Summary:

I'm an experienced 3D artist and interior designer. I have a passion for 3D media and technology and love delving into the technical side of things. Since 2016 I have been freelancing as an Architectural Visualisation artist, providing services to designers and architects. During this time my business grew through word of mouth and personal references, and my references will attest to my abilites and expertise. Recently I have also been teaching in the Interior Design department at CIT where I am able to share my passion and expertise for all things 3D with the next generation of designers.

Career Histroy:

Architectural Visualisation Artist - Self Employed
March 2016 - Current
